

MICRO BUBBLES RECREATION CENTERS RELAX AND THERAPY

NIKUNI - WIB (White Ion Bath), high efficient units to be used at water recreation centres

Nikuni-WIB offers unique, patented system of generating highly saturated dissolved air for water recreation centres. These micro bubbles are of the size **20 ÷ 30 µm**, that gives impression of smoke in the water, while exploding, affect in a relaxing and therapeutic way on the bodies of bathing people.

TECHNICAL DATA

- Pump efficiency: **1,5m³/h ÷ 15,6 m³/h.**
- Micro bubbles size **20 ÷ 30 µm**

DESIGN:

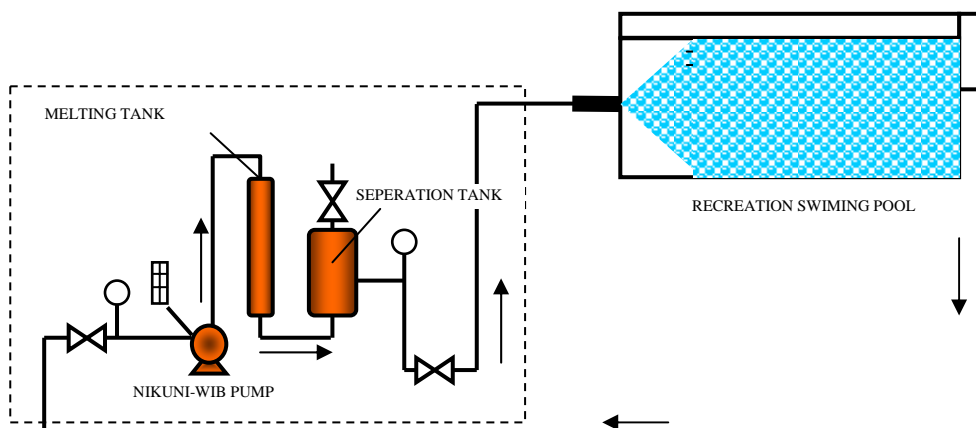

- Nikuni-WIB unit is a small compact device.
- Excellent bubble generator for exercising three functions at the same time :
suction, mixing and force-feed function
- Nikuni-WIB operates in a close circulation (see outline on another page)

NIKUNI WIB UNIT

SERVICE AND OPERATION

- Easy to operate
- Micro bubbles are generated immediately after switching unit on
- No need to monitor Nikuni-WIB unit parameters

Outline for Nikuni-WIB

NIKUNI - WIB SPECIFICATION

TYP POMPY	EFFICIENCY (m ³ /h)	MOTOR (kW)	SURFACE AREA (m ²)	WATER CAPACITY (m ³)
M25NPD	1.5	1,5	~ 1,0	~ 0,5
M32NPD	3.0	2,2	~ 1,0	~ 1,2
M40NPD	4.8	3,7	~ 4,0	~ 2,4
M50SP1	8.4	5,5	~ 6,0	~ 3,5
M50SP2	12.6	7,5	~ 8,0	~ 4,5
M50SP3	15.6	11,0	~ 10,0	~ 6,0

Saturated water with micro bubbles could be used as a screen for picture presentation on recreation swimming pools surface.
